EDUCATION

Indian Institute of Technology,Dharwad - B.Tech (Computer Science & Engineering)

Nov 2020 - Present

CGPA: 8.48

Courses: Data Structure and Algorithms ,Software Systems,Computer Architecture

PROJECTS

- **AI based crop disease detection app** - This project is a mobile application wherein a farmer can take a picture of a crop of which he wishes to diagnose the condition. User can login, signup, logout. The app further loads the appropriate model(s) as instructed by the respected API and generate the disease present on the crop. These all disease outputs can be viewed by user when he logs into the app. The app is made using **Flutter** and **Django Rest Api** is used for the backend. [FrontendGithubRepo](#) [BackendGithubRepo](#)
- **Travelling Website** - A responsive website in which we can book holiday packages available. We can **filter** packages by duration of the holiday package, cost per person, Month Of Travel, Travel Mode, destination. We can sign up, login, logout. All authentication is done by **JSON Web tokens** only. All Holiday packages info is added to **Mongodb** using **Node js**, **Express** and they are retrieved and displayed using **React js** on website. [Githubrepo](#)
- **MyNotes** - A responsive website in which we can add notes,delete notes,update notes.For login authentication I used JSON Web tokens.Password is encrypted and stored in database.This project is done using **React js**, **Node js**, **Express**,**Mongo db**. [Githubrepo](#)
- **Front-end single page application** - This is a single page responsive website which is mainly designed for showing my Html,Css skills.
 - 1) Here is [Githubrepo](#) and this is [websiteLink](#) of one spa.
 - 2) Here is [Githubrepo](#) and this is [websiteLink](#) of another spa.
- **NewsFetch** - A website in which we will fetch news from an api and categorise them like sports news,tech news...This project is done using **React js**. [Githubrepo](#)
- **Airline Management System** - A website in which we will book flight tickets ,cancel booked tickets,login page,sign up page etc..This project is done using Html,Css,Javascript,Php,Mysql.[Githubrepo](#) **YoutubeLink:** <https://youtu.be/KSAo69KpeMk>
